Volume 118 May 1982

CONTENTS

An experiment on the flow past a finite circular cylinder at high subcritical and supercritical Reynolds numbers. ALFRED AYOUB and K. KARAMCHETI *page* 1

On the nature of the dynamic contact angle: an experimental study. CLIFTON G. NGAN and ELIZABETH B. DUSSAN V. 27

The measurement of Reynolds stresses with a pulsed-wire anemometer. I. P. CASTRO and B. S. CHEUN 41

An experimental study of the wall-pressure field associated with a turbulent spot in a laminar boundary layer. T. S. MAUTNER and C. W. VAN ATTA 59

Vortex–leading-edge interaction. SAMIR ZIADA and DONALD ROCKWELL 79

Motion of air cavities in long horizontal ducts. D. L. WILKINSON 109

Convective response of a mass of water near 4 °C to a constant cooling rate applied on its boundaries. L. ROBILLARD and P. VASSEUR 123

The response of a turbulent boundary layer to a short length of surface roughness. J. ANDREOPOULOS and D. H. WOOD 143

Nonlinear critical layers and their development in streaming-flow stability. F. T. SMITH and R. J. BODONYI 165

Control of laminar-instability waves using a new technique. H. W. LIEPMANN, G. L. BROWN and D. M. NOSENCHUCK 187

Active control of laminar–turbulent transition. H. W. LIEPMANN and D. M. NOSENCHUCK 201

Comparison of direct numerical simulations with predictions of two-point closures for isotropic turbulence convecting a passive scalar. JACKSON R. HERRING and ROBERT M. KERR 205

A theoretical and experimental study of the capsize of Salter's duck in extreme waves. M. GREENHOW, T. VINJE, P. BREVIG and J. TAYLOR 221

The structure of the large eddies in fully developed turbulent shear flows. Part 1. The plane jet. J. C. MUMFORD 241

An experimental investigation of oscillatory flow in pipe bends. ARNOLD F. BERTELSEN and LEIF K. THORSEN 269

Soliton models of long internal waves. HARVEY SEGUR and J. L. HAMMACK 285

On local analysis of instability by magnetic buoyancy. M. P. GIBBONS 305

Anisotropic modelling of thermal convection in multilayered porous media. Robert McKibbin and Peder A. Tyvand 315

Numerical investigation of turbulent channel flow. Parviz Moin and John Kim 341

Thin slender water jets. M. S. Borgas and E. O. Tuck 379

The initial lift and drag of an impulsively started airfoil of finite thickness. Cheun-Yen Chow and Ming-Ke Huang 393

A Fourier method for solving nonlinear water-wave problems: application to solitary-wave interactions. J. D. Fenton and M. M. Rienecker 411

Measurement of fluid turbulence based on pulsed ultrasound techniques. Part 1. Analysis. Joseph L. Garbini, Fred K. Forster and Jens E. Jorgensen 445

Measurement of fluid turbulence based on pulsed ultrasound techniques. Part 2. Experimental investigation. Joseph L. Garbini, Fred K. Forster and Jens E. Jorgensen 471

Why, how, and when, MHD turbulence becomes two-dimensional. Joël Sommeria and René Moreau 507

Convergence of line-renormalized expansions in turbulence theory. William A. Perrie 519

Reviews

Mean-Field Magnetohydrodynamics and Dynamo Theory, by F. Krause and K.-H. Rädler 530

Mechanics of Swimming and Flying, by Stephen Childress 531

The Inverse Scattering Transformation and the Theory of Solitons, by W. Eckhaus and A. van Harten 532

Corrigendum 533
